Diell Govori

AI Engineer • Agentic Systems, RAG Architecture & LLM Production Infrastructure

diellgovori9@gmail.com • +383 45 720 374 • linkedin.com/in/diell-govori • github.com/Dielldev • diellgovori.vercel.app

EDUCATION

UBT – University for Business and Technology | Pristina, Kosovo — Oct 2025 – Jun 2028

B.Sc. in Computer Science and Engineering

EXPERIENCE

AI Engineer Intern | StarLabs (Pristina, Kosovo) — Oct 2025 – Mar 2026

- Developed and deployed a production **Retrieval-Augmented Generation (RAG)** pipeline for Digital School's educational platform, optimizing dense embeddings, chunking strategies, and retrieval reliability.
- **Fine-tuned a local LLM** to improve domain-specific task performance, integrating **Hugging Face Transformers** and the **OpenAI API**.
- Built and tested asynchronous **Python FastAPI** inference endpoints to serve AI model outputs in production.

Penetration Testing / AI Security Intern | Pretera (Pristina, Kosovo) — Mar 2026 – May 2026

- Identified and exploited **OWASP Top 10 vulnerabilities** (SQLi, XSS, CSRF, SSRF, XXE, SSTI, broken access control) in web applications using **Burp Suite** and **Kali Linux** per the PortSwigger BSCP methodology.
- Authored formal vulnerability finding reports with deterministic reproduction steps and remediation guidance, including **LLM-specific attack vectors**.

Full-Stack Web Developer | Freelance (Upwork & Direct Clients) — Jun 2023 – Present

- Built and shipped responsive web platforms across **6+ client engagements**—including Aorta Plus Polyclinic (online appointment booking system) and Banesa PR (Pristina real-estate search platform)—using **TypeScript, React, Next.js, Angular, and Tailwind CSS**.
- Designed and integrated **REST APIs**, authentication flows, and relational database schemas (**Node.js, PostgreSQL, Supabase**), deploying full-stack applications to production with **Git** and **Vercel**.

AI & AGENTIC ENGINEERING PROJECTS

egant (Live Site) – **Desktop Coding-Agent Orchestrator** | *Rust, Tauri v2, React, TypeScript, libgit2, MCP* — 2026

- Built **egant**, a native **Rust + Tauri v2** desktop orchestrator with **4 custom Rust crates** for running **3+ parallel coding agents** in isolated **Git worktrees** with live chat streaming, **MCP server sync**, diff inspection, and turn-by-turn state reversal.
- Engineered modular backend crates for worktree isolation (**libgit2**) and local PTY execution; shipped to production (egant.vercel.app), onboarding **40+ active users**.

Agentic CRAG – **Multi-Agent Corrective RAG** | *LangGraph, Llama 3.3 70B, Qdrant, FastEmbed, FastAPI, Docker* — 2026

- Built a self-correcting **Corrective RAG (CRAG)** pipeline as a **4-node stateful LangGraph** multi-agent graph that grades its own retrieval quality and rewrites weak queries before falling back to live **Tavily** web search, eliminating silent hallucinations.
- Engineered dedicated **retrieve, evaluate, rewrite, and verify** agents with score-based routing, **Qdrant + FastEmbed** vector search, **LangSmith** tracing, and post-generation groundedness checks to guarantee answers are backed by source documents.

Mesh – **MCP Server & Agent Knowledge Graph** (Live Demo) | *TypeScript, MCP, Next.js, Supabase* — 2026

- **1st Place Winner (Genpact x Agilyti Hackathon):** Built a **4-package TypeScript monorepo** and **Model Context Protocol (MCP)** server in **6 hours** that captures live progress, intent, blockers, and dead ends across **4 coding-agent CLIs** (Claude Code, Codex, Cursor, Gemini CLI).
- Implemented automated multi-agent collision detection and a natural-language **"Ask"** query interface backed by **Supabase PostgreSQL**, preventing agents and engineers from duplicating failed approaches.

Folio AI Screener (Live Demo) | *React, FastAPI, Groq, Hugging Face, Supabase* — 2026

- Built **Folio**, an AI portfolio tracker using **Groq (llama-3.3-70b-versatile)** for natural-language position parsing and **Hugging Face (all-MiniLM-L6-v2)** embeddings to rank financial news across **SEC EDGAR (8-K, 10-Q, 10-K)** filings and **30-day RSI/MA** indicators.

HACKATHON AWARDS & LEADERSHIP

- **1st Place – Genpact x Agilyti Hackathon (2026):** Built and shipped Mesh (4-package MCP telemetry monorepo) under a **6-hour deadline**.
- **1st Place – Healathon Healthcare Hackathon, Swiss TPH / IHS (2026):** Won 1st place with a WebVR exhibition on non-communicable diseases, built and pitched under a **48-hour deadline**.
- **Challenge Winner (2nd Place) – Junction Finland (2024):** Selected as a challenge winner at Europe's largest hackathon in Helsinki; built Aava Match, an AI swipe-based job-matching platform, in **48 hours**.
- **1st Place – JunctionX Tirana (2024) & Hackathon Ambassador:** Won 1st place building **Erta Flow** (client management web app) in **48 hours**; serve as **Hackathon Ambassador** at **Hackathon Hub Kosovo**.

TECHNICAL SKILLS

Programming Languages: Python, TypeScript, JavaScript, Rust, SQL.

LLMs & Agentic AI: LangGraph, LangChain, Model Context Protocol (MCP), OpenAI API, Anthropic Claude API, Groq, Hugging Face Transformers, typesafe-ai/jev, Structured Outputs, LangSmith, n8n.

RAG, Embeddings & ML: Corrective RAG (CRAG), Qdrant, FastEmbed, SentenceTransformers, LLM Fine-Tuning, Scikit-Learn, Tavily API, Model Evaluation, Feature Engineering.

Backend, Infrastructure & Security: FastAPI, Next.js, React, Tauri v2, Supabase (PostgreSQL), Docker, Git, LLM Red-Teaming & OWASP Top 10.
